Subject: Explosion Isolation Flap Valve by IEP Technologies

IEP Technologies is pleased to announce the official release of our new Isolation Flap Valve, the "IsoFlap-M™". The IEP Technologies Passive Isolation Flap Valve is a NFPA 654, 69 and EU ATEX Directive compliant, low cost, reliable explosion isolation solution which mitigates explosion propagation risks to upstream equipment.

The Product Information Sheet and press release are attached for your review. Please contact your IEP Technologies Regional Manager with any question or opportunities regarding this new introduction to our range of explosion protection solutions!
